

Senate Chair's Report  
December 9, 2014

I attended the meeting of the Campus Senate Chairs in Long Beach last week. The meeting include wide ranging discussions of a number of items, the most relevant of which for our campus were Course Match seat allocations, CSU Fullerton's plan to decide on the allocation of reassigned time for exceptional service to students under the new CBA, and intellectual property rights. These issues will all likely be coming to the Senate via the appropriate committees next semester.

The strategic planning process is also moving forward. We are currently working to identify an appropriate time to hold a campus-wide open forum, likely a half-day event that would include both a general discussion of campus priorities and more focused consideration of issues related to each of the three task forces. The event would likely take place early in the spring semester. In addition, individual task forces are reaching out to target groups and individuals to secure input and feedback.

Finally, as this is our last meeting this semester, I want to thank all of you for your service on the Senate. I recognize that it is a time consuming, sometimes frustrating responsibility. I appreciate each of your work and commitment to the process! I especially want to thank Jennifer Delsant, who has served as the Senate's ASC for much of this semester. She kept the Senate office not only functional but moving forward this semester. Thank you!
